

BENJAMIN KUEHN

DevOps Engineer with 12 years of experience in building scalable solutions and automating infrastructure.

📞 414-897-3061 @ kuehnbt@gmail.com 🔗 <https://www.linkedin.com/in/benjamin-kuehn/> 📍 Washington DC

SUMMARY

With over 12 years in DevOps and System Administration, I specialize in cloud infrastructure, automation, and CI/CD pipelines. I excel at designing and implementing scalable solutions on-premise, and in Azure and AWS. Skilled in PowerShell and Python scripting for process efficiency. Renowned for solving complex problems and working well in team settings. Passionate about gaming and ready to enhance gaming experiences with innovative cloud solutions.

EXPERIENCE

DevOps Engineer

Ascensus 📅 2024 - Present

- Oversee server builds, deployments, integration, automation, and software releases
- Collaborate with teams to optimize monitoring, performance, and infrastructure as code standards
- Develop processes for automated builds and deployments, leading efforts to streamline the pipeline
- Participate in architecture and design discussions, contributing to solutions architecture and automation templates
- Implement new tools and technologies to improve the SDLC pipeline
- Provide day-to-day support for application engineers and promote DevOps practices within the team
- Developing infrastructure and pipelines for internal Generative AI system

Associate DevOps Developer

Ascensus 📅 2021 - 2024

- Assist in server builds, deployments, integration, automation, and software releases
- Collaborate with teams to monitor and improve environment performance and infrastructure as code practices
- Support the development of automated scripts for software builds and deployments
- Provide day-to-day support for application engineers and promote DevOps practices within the team
- Help optimize and maintain production application environments
- Ensure the security of applications and infrastructure
